

# Watershed Field Programs

The Cedar River Watershed Education Center offers free education programs to schools and groups. These programs meet the Washington State K-12 Integrated Environmental and Sustainability Education Learning Standards.

## REGISTRATION

All School programs are FREE. Sign-ups for Seeing the Source and Land and Water programs are based on a NEW pilot lottery process. Applications for Spring 2011 programs will be taken between December 1, 2010 and January 7, 2011.

The application window for the combined Fall 2011 and Spring 2012 school year lottery will be between June 1 and August 26. Reservations for Water is Magic visits are first-come, first-called and are taken year-round. Look for our new "Teachers Page" with the application form and lottery details in early December 2010 at <http://www.seattle.gov/util/CRWEC>.

### 1 WATER IS MAGIC

**This flexible self-led immersion explores water's many wondrous properties.**

Field trips to the *Water is Magic* exhibits are available to any class or organized group. Options for a Naturalist-led introduction or extended program may be available. Participants travel through the water cycle, listen to stories of the past and present, and investigate the source of their drinking water. *Reservations required for 10 or more.*

### 2 SEEING THE SOURCE

**Take a journey into the heart of the Cedar River Watershed on a Naturalist-led field trip to see the source of students' drinking water.**

Hands-on activities encourage understanding of water cycles, watersheds, water quality, erosion, cultural history, riparian areas and wildlife. Teachers **must** provide commercially licensed school buses or vans. *Bus subsidies are available for Seattle Public Schools.*

### 3 LAND AND WATER

**Take a Naturalist-led journey to the Water is Magic exhibits and Rattlesnake Lake basin to explore the connections between land, water and people.**

Students take a closer look at nature through water testing and high quality microscopes. In the exhibit hall students travel through the water cycle, listen to stories of the past and present, and investigate the source of their drinking water.
